Legalease: AI Powered Legal Document generator

Deepthi sri

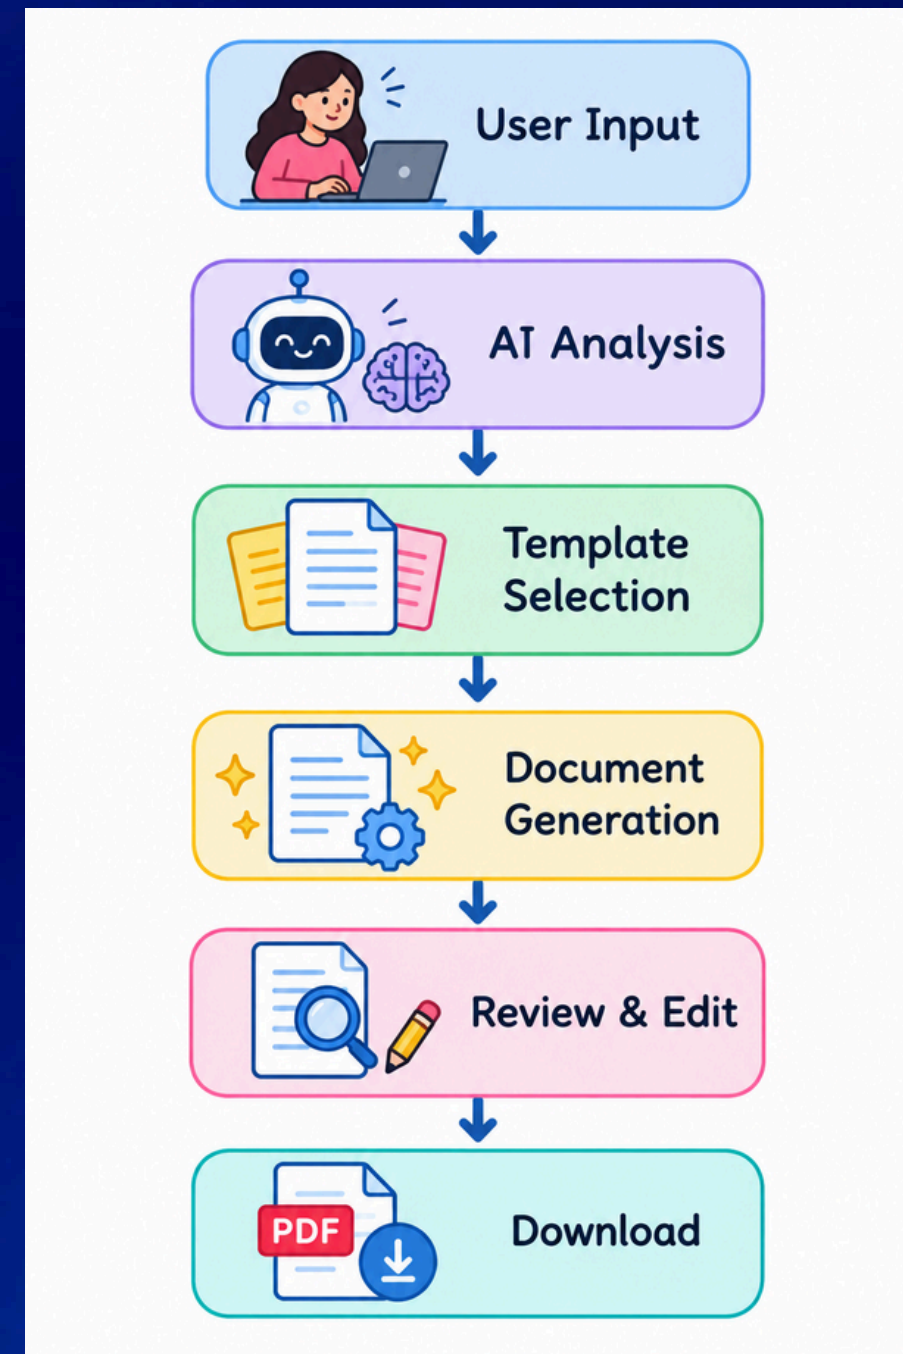

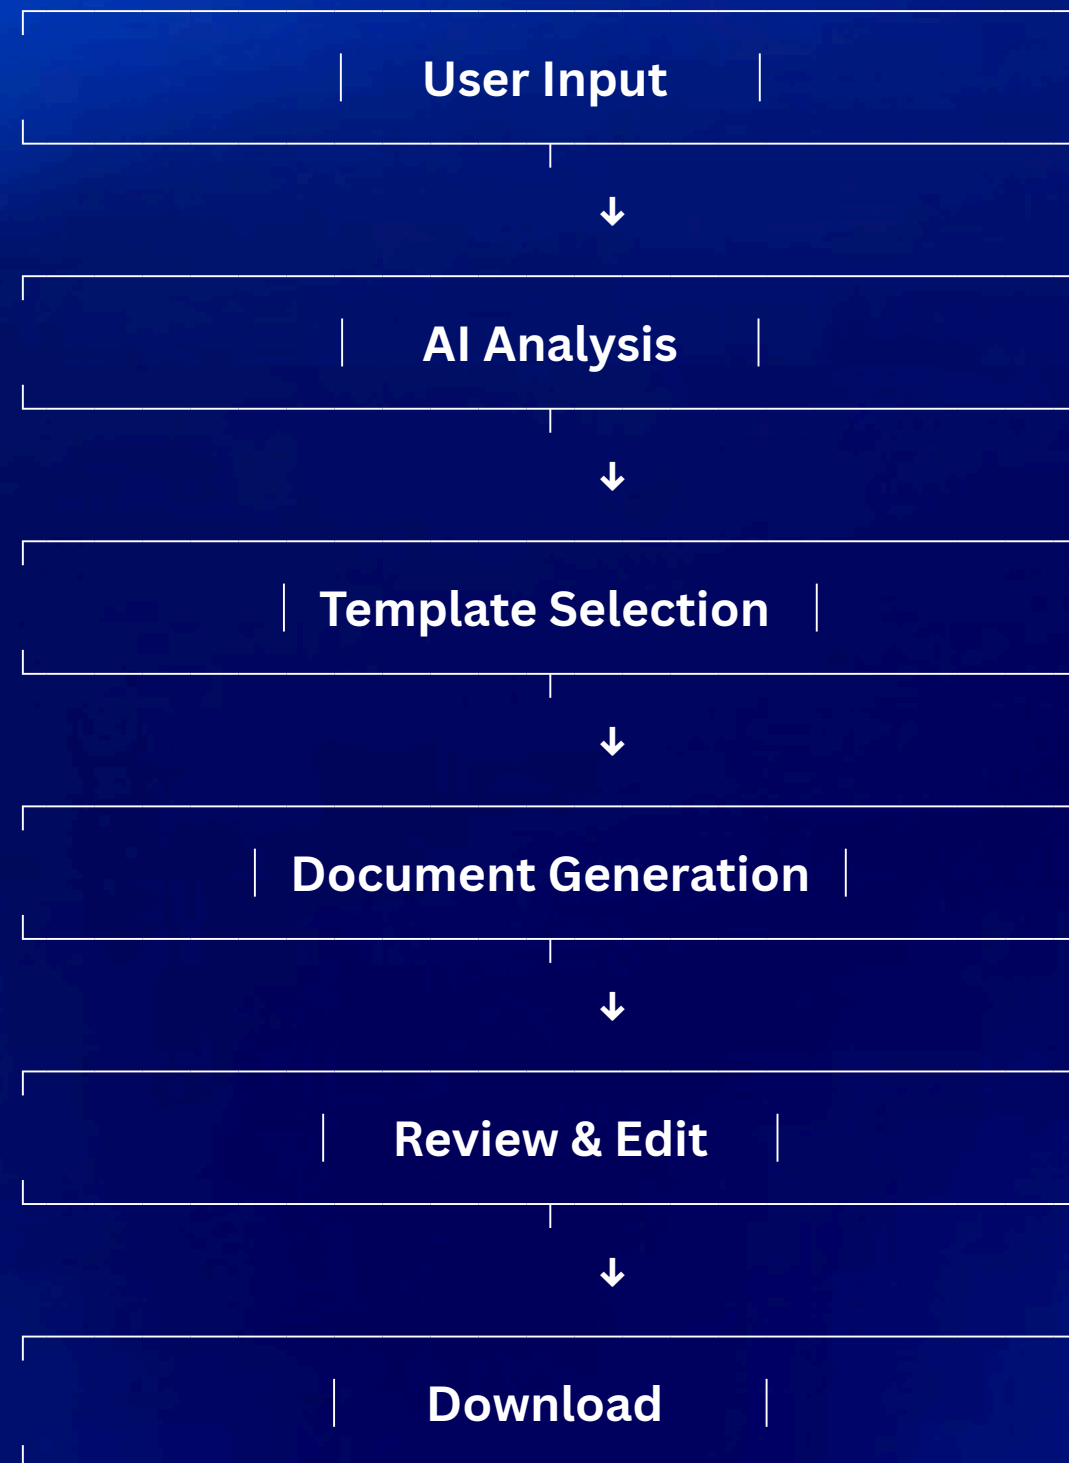

INTRODUCTION

- **LEGALEASE is an AI-based legal document generation system.**
- **It helps users create basic legal document drafts easily.**
- **Users provide their requirements and necessary details.**
- **AI processes the information and generates a structured draft.**

PROBLEM STATEMENT

PROPOSED SOLUTIONS

OBJECTIVE

To simplify legal document drafting.

To reduce manual work and time.

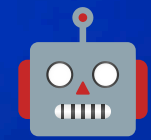

To generate structured document

To identify missing information.

To provide an easy-to-use interface.

To support PDF/DOCX document generation

KEY FEATURES

AI Document Generation

Generates drafts from user requirements.

Multiple Templates

Supports different types of documents.

Edit & Review

Users can modify the generated draft.

Information Validation

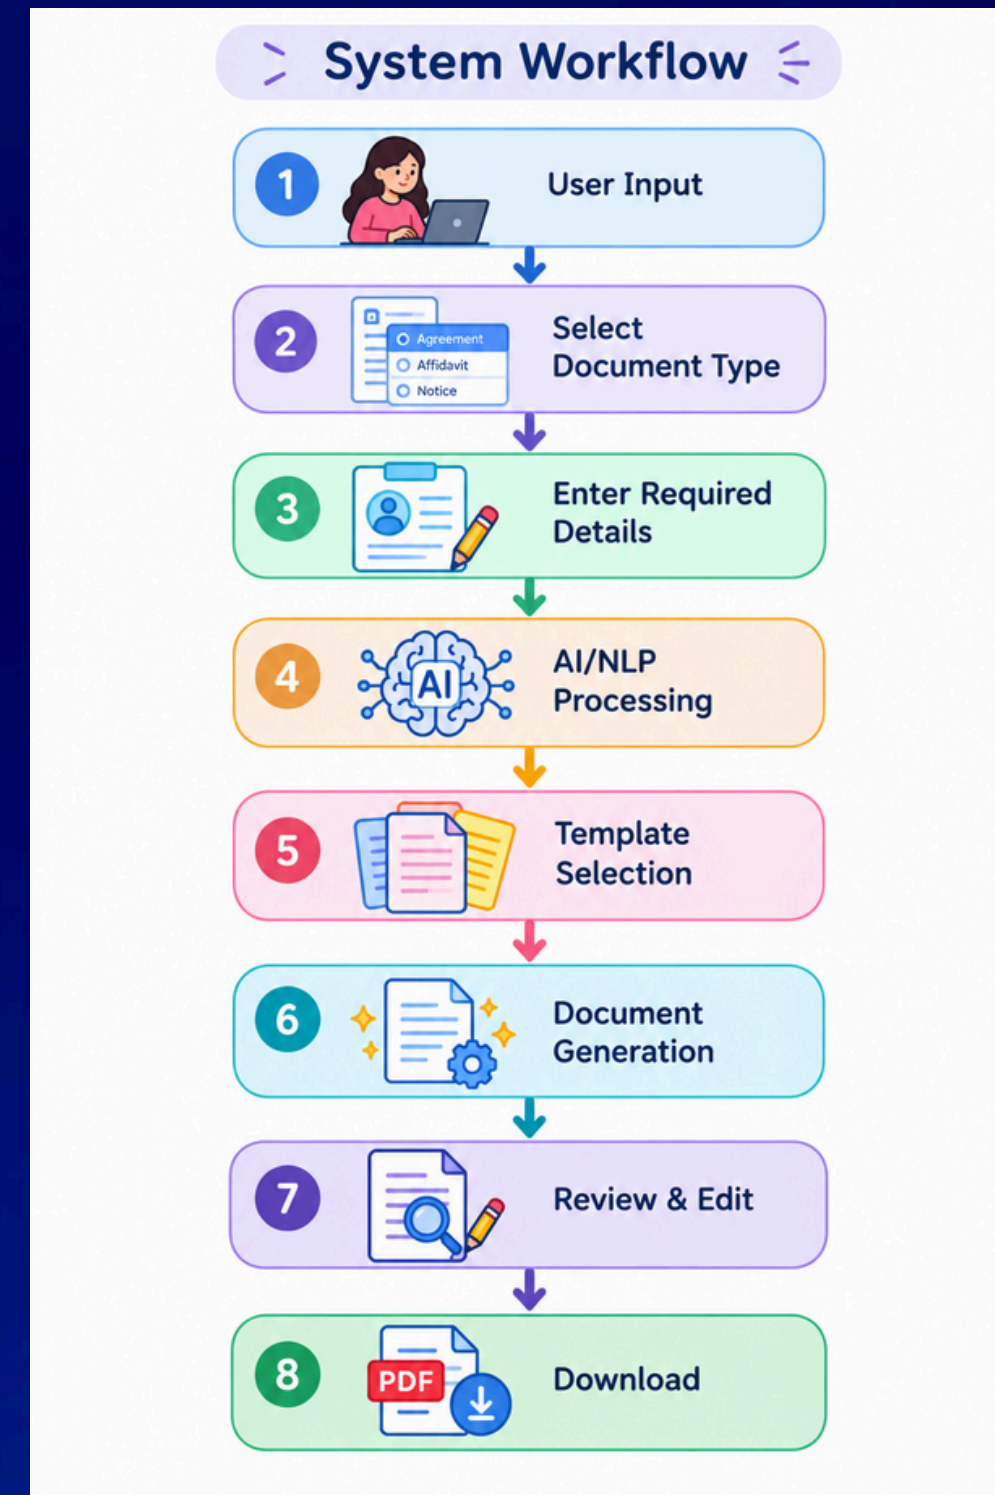

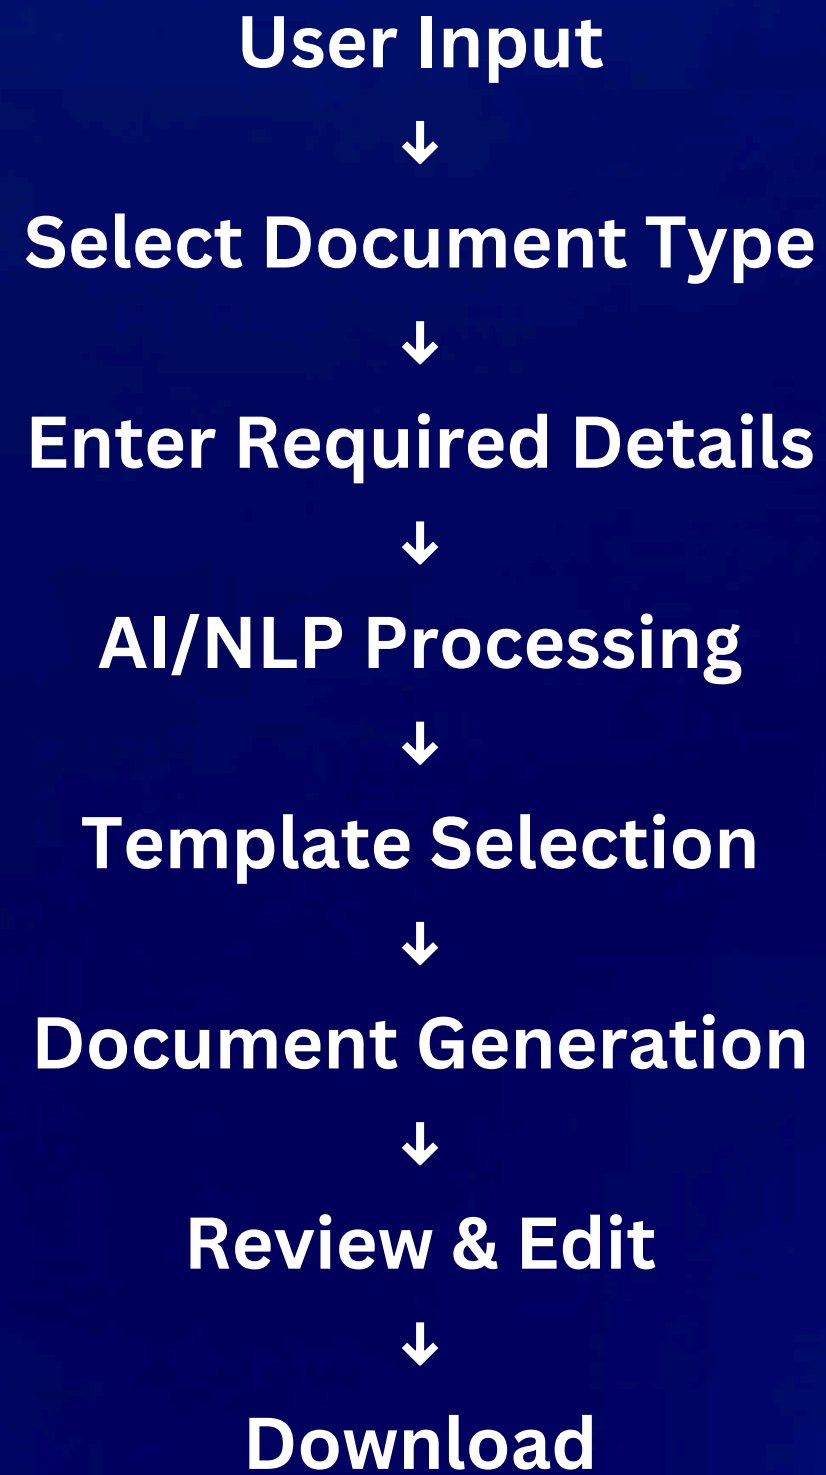

Checks required details.

Download

Export the final draft as PDF/DOCX.

SYSTEM WORKFLOW

TECHNOLOGY STACK

Technology	Purpose
HTML, CSS, JavaScript	Frontend
Python	Backend
Flask / FastAPI	Web Framework
NLP / LLM	AI Processing
MySQL / MongoDB	Database

AI MODULE

The AI module is the main component of LEGALEASE.

- Understands natural-language input.
- Extracts important information.
- Identifies the document type.
- Selects a suitable template.
- Generates structured content.
- Detects missing information.

APPLICATION & BENEFITS

Saves time
Easy to use
Reduces repetitive work
Provides consistent formatting
Makes basic drafting more accessible

FUTURE SCOPE

Regional language support

Voice-based document generation

Mobile application

E-signature integration

Lawyer review integration

Jurisdiction-specific templates

FINISHED PRODUCT

Legal-content update system

CONCLUSION

LEGALEASE

LEGALEASE combines Artificial Intelligence, NLP and document automation to simplify basic legal-document drafting.

Faster document preparation

Simple user interaction

Structured document generation
